

Sai Dhruva K V

Frontend Architect — Design Systems, Component Architecture & Performance at Scale

Design Systems · Component & State Architecture · Performance · Accessibility (WCAG)

Bengaluru, India · +91 8123 166 570 · sai_dhruv@hotmail.com · sai.dhruv.99@gmail.com · linkedin.com/in/saidhruv · sdkv.in

ALSO AVAILABLE: [AI & Technology Leader](#) → · [Senior Technical Program Manager](#) →

PROFESSIONAL SUMMARY

Frontend Architect and engineering leader with 10+ years leading ReactJS and React Native at scale — design systems, component and state architecture, and front-end standards that turn product vision into fast, accessible, maintainable interfaces. Hands-on across performance, accessibility (WCAG), and developer experience while mentoring engineers and directing cross-functional delivery.

Highlights: 10+ years leading at scale · 6.5 years enterprise React platform (FINEOS) · 10+ organizations shaped · 20+ technologies delivered · 20% faster time-to-market (HPE) · WCAG-compliant delivery (Goin).

CORE COMPETENCIES

Frontend Architecture, Design Systems, Component & State Architecture, Performance Optimization, Accessibility (WCAG), Design-Dev Collaboration, Team Leadership, Mentoring & Coaching, Technology Strategy, Cross-Functional Delivery, Agile Delivery, Technical Vision.

TECHNICAL SKILLS

Engineering: ReactJS, Next.js, React Native, JavaScript, TypeScript, HTML, CSS Architecture, GraphQL, Elasticsearch, State Management, Testing, Node.js, iOS, Android

Cloud (AWS): Lambda, API Gateway, CloudFormation, DynamoDB, CloudFront, CloudWatch, Cognito, S3

AI & Data: Generative AI, LLM Products, Agentic AI, ML Pipelines, Data Architecture

DevOps & CI/CD: Terraform, CircleCI, Jenkins, GitHub, Bitbucket

Tools & Design: Figma, Adobe Photoshop, Jira, Asana

PROFESSIONAL EXPERIENCE

AMD — Consulting Architect

via Infobell IT Solutions Pvt. Ltd. · February 2025 – Present

- Lead front-end architecture and technical direction for role- and entitlement-aware ReactJS analytics applications, guiding engineers through the full SDLC.
- Architected a reusable component system and front-end standards for performance-analytics UIs, enabling secure natural-language search and multi-dimensional comparison.
- Directed component and state architecture and design-dev collaboration so stakeholders explore complex benchmark data through consistent, accessible interfaces.
- Established front-end delivery guardrails — reuse, access control, and automated testing — that kept analytics UIs consistent and auditable across teams.
- Mentored engineers and aligned teams onto shared component libraries, standards, and delivery practices, lifting overall UI quality.

FINEOS (formerly Spraoi) — Senior Software Developer

FINEOS Corporate Holdings, Ireland · March 2018 – January 2025

- Led cross-functional teams of ~20 engineers, designers, and QA to deliver an enterprise insurance portal front end on ReactJS, Node.js, GraphQL, and Elasticsearch.
- Built and owned a reusable component system and front-end standards spanning product showcase, e-commerce, document management, and claims tracking.
- Architected component and state patterns across a 6.5-year enterprise React platform, raising consistency, scalability, and shipping velocity.
- Drove design-dev collaboration and a reusable workflow builder that let teams compose and deploy UI flows rapidly, eliminating duplicated engineering effort.
- Mentored developers and set front-end and delivery standards that raised code quality and shipping consistency across the portal.

Goin LLC — Consulting Mobile Application Developer

June 2017 – March 2018

- Led development of an inclusive cab aggregator with a strong focus on accessibility (WCAG) for riders with disabilities.
- Built an iOS Rider app and a React Native Driver app; defined requirements and coordinated design and QA for registration, booking, and real-time tracking.
- Applied accessibility guidelines to ride-tracking UX driven by driver activity.

HPE — Consulting Mobile Application Developer

October 2016 – June 2017

- Led rapid-prototyping of cross-platform ReactJS and mobile front ends supporting HPE's mobility product strategy.
- Delivered cross-platform solutions in ReactJS, Android, and PHP/MySQL, expediting time-to-market by 20%.

iService — Mobile Application Developer

Service Monk Technologies Pvt. Ltd. · October 2015 – October 2016

- Built a CRM suite front end with integrated geo-fencing and mobile lab testing, ensuring scalability across fragmented Android ecosystems.

Freelance Consultant — Part-time, concurrent

2016 – Present

- Partnered with diverse clients to design and build tailored web and mobile front ends across JavaScript frameworks and cloud services, on time and within budget.
